

The logo for 'Toronto gear' features the word 'Toronto' in a bold, black, sans-serif font. The letter 'o' is replaced by a teal gear icon. Below 'Toronto', the word 'gear' is written in a teal, lowercase, sans-serif font. The entire logo is set against a background of a city skyline at dusk, with several skyscrapers visible. A large, stylized gear is superimposed over the buildings, with its teeth pointing upwards and to the right. The sky is a mix of purple and blue, suggesting twilight.

Toronto gear

Our world never stops

connected

*One world...
one complete source...*

The world is constantly changing, shrinking, moving. Nothing in our world ever stops. Because the business we're all in is the business of motion. At Toronto Gear, we have the history, the expertise, and the inventory to keep things moving for you. A broad, deep assortment of gears, belts and pulleys that we can deliver to your door, usually the next day. We'll help you keep connected to your customers by keeping your plant in operation, even when machinery breaks down.

Stock mitre gears

Made to order round rack

speed

Stock worm, spiral and spur gears

Information technology has sped up all our lives. At Toronto Gear, we're constantly looking for better ways to use that technology to help keep your business running. Smoothly and without interruption. With high quality products. Competitive pricing. Timely delivery, through warehouses in Toronto, Montreal, Edmonton and Chicago. And fast turnaround on all your stock and custom needs.

Our commitment means less for you to worry about. And freedom to pursue your business goals.

freedom

custom applications

Our commitment to creating solutions in motion has been the driving force in our company for many years. And that's what you can expect when you put us to work for you. All custom applications are made to order on our shop floor, to your specifications, drawing or sample.

Toronto Gear is proud to be a distribution partnership with one of the world's leading manufacturers....

Boston Gear.

In addition to our own product lines, we offer a complete range of Boston gears. Of course, everything is in stock and ready to ship for next day delivery, anywhere in Canada.

Made to order bronze splined bushing

To do a good job, you need good people. At Toronto Gear, our manufacturing and technical standards are second to none. But in the end, it's really not machines that make the difference. People do. We're proud of the expertise of our team at Toronto Gear. Their dedication and experience are your assurance of the quality that goes into every product we make.

When you look at our customer service record, our made-to-order expertise, our stock inventory, prompt delivery and pricing, you'll see that Toronto Gear is a proven choice.

Give us a call the next time you need it *now*, and see for yourself how good personal service can get.

Toronto Gear. Our world never stops.

Toronto Gear was founded in 1963 with a mission to give industry a world-class line of power transmission products. We were the first manufacturer of synchronous pulleys in Canada, and remain the only Canadian producer to this day. Our product line includes thousands of stock and custom gears, timing pulleys and timing belts.

Let's talk specifics...

- We can produce gears up to 40 inches in diameter—from 64 DP to 2.5 DP, 0.100 to 1 CP and 0.5 to 8 MP.
- Gear Rack from 64 DP to 3 DP, up to 8 feet in length.
- Timing Pulleys up to 40 inches in diameter—from .080 pitch to 1-1/8 pitch, 5mm, 10mm, 20mm and most "AT" metric pitches. Some sizes are also available in reduced or zero backlash.
- HTD/RPP Pulleys up to 40 inches in diameter, from 3mm to 20mm.

To manufacture this variety of gears, pulleys and racks, we use engine and CNC lathes with a capacity of up to 12 inches, and work from a bar up to 4 inches in diameter. We have drilling, tapping and milling attachments on these machines. We also manufacture silent chain sprockets, and are proud to be licensed by Gates as a maker of polychain exclusively for Gates.

Of course, if one of our stock products doesn't meet your needs, we'll produce to your specifications. Breakdown service is available to all our customers.

Give us a call today with your requirements.
